Welcome to Care Nursing

“Dear Care Nursing,

I should just like to let you know how impressed I have been with the level of care, continuity and affection provided to my mother, in particular by Linda and Rachel, her two main carers. I cannot fault the standard of care and commitment and I'm very grateful to your whole service.

Many, many thanks, Mrs G”

Care Nursing is based in Cheshire and is very much a family run business which provides home care solutions to all client groups where care and support is required.

Since the company was established in 1987, it has provided a cost effective service to those requiring assistance with their daily living. From complex care support through to domestic chores we are able to provide a complete home care service which meets the needs of our customers.

Care Nursing places huge importance on the training of its carers and provides specialist training to its team to ensure that they meet the varied requirements of the customers that we look after.

From specialist dementia training to food hygiene courses, Care Nursing carers have the skills and experience you need to maintain your independence regardless of your specific health needs.

All customers are treated as individuals and a bespoke package of support is tailored to suit your needs and wishes.

This brochure will give you a general outline of the company and the services that we provide but if you require more information then please don't hesitate to contact our office where one of our team will be more than happy to assist you.

Personal Care/Domestic Services

Whether it is to help you with personal care, shopping and housework or just someone to befriend, our home support service aims to support you to continue to live independently at home.

Care Nursing provides the right sort of assistance in the way that people want it. We aim to support people to live fulfilled and satisfying lives in their own homes and communities where they belong, are known, and often have lived for a long time.

Our trained staff visit clients in their own homes from a minimum of 15 minutes to 24 hours, seven days a week offering assistance, support and encouragement in all aspects of personal care tasks.

This helps maintain individuals' personal skills and abilities and a sense of personal identity. We recognise that people need to remain as independent as possible and are keen to promote this. We also provide practical assistance with household tasks, shopping, etc.

Specialist Dementia Care

Everyone's experience of dementia is unique, how they cope with their illness depends on the support and understanding they receive from their family, social network, employment and their own individual personality.

Care Nursing recognises this and strives to offer specialist services to meet their multitude of needs.

Live in Care

For those that value their independence, that want to stay behind their own front door and not have to leave their cherished home or pets, Live-in Care is the perfect solution.

A fully trained Live-in Carer lives in the home and provides bespoke one-to-one full time care and companionship, following an agreed care plan that is personalised to the individual.

Training

Following the success of Care Nursing's own in-house training, it was decided that we should offer this service to external companies who require a quality training provider for their own staff.

Care Nursing is now in a position to offer these services and the individual courses we offer are detailed below.

All of our training courses are fully accredited with the relevant awarding body and come with certification from them.

If you require any information about costs or training dates then please contact our Training Manager to discuss your requirements.

- Manual Handling
- Fire Safety
- Safe Food Handling
- Infection Control
- Basic First Aid
- Health and Safety
- Abuse
- Dementia Care

Recruitment

We recognise that quality service can only be provided if the employees receive quality training and opportunities for career development.

We ensure that high quality standards of personal care and support are provided to all our clients and that all staff have the necessary skills, knowledge, qualifications and experience in order to meet the needs of the individual clients with whom they work.

We are proud to have been awarded the Investors In People award which is confirmation of our emphasis on training.

Care Quality Commission

Care Nursing is registered with the Care Quality Commission to provide domiciliary care in the community and has developed several methods and systems to ensure this is maintained to the highest possible standard.

A copy of our latest inspection report is available from their website www.cqc.org.uk
